

Welcome to Zoology and Entomology department, home to our biological sciences. Our department offers postgraduate programs at Masters (M.Sc) and Doctorate (Ph.D) levels.

How to apply?

To be admitted to the Master (M.Sc.) program, the candidate must hold a Bachelor

Degree in Zoology or Zoology- Chemistry with at least Grade very good from any Egyptian Universities or any other equivalent and recognized degree from the Supreme Council of Universities with at least Grade (V.Good) or Higher Learning Diploma Recognized from Supreme Council of Universities with at least Grade (V.Good).

To be admitted to the Doctorate (Ph.D) program, the candidate must hold a Master Degree in postgraduate programs of Zoology and Entomology.

Fees

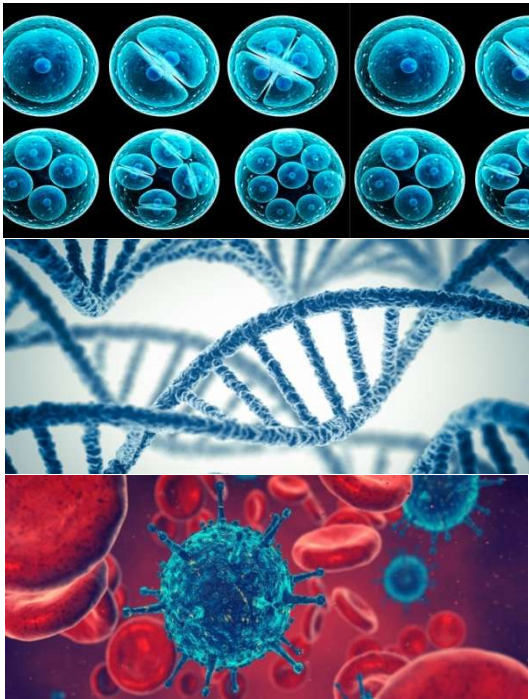

For Egyptian students:

- Master (1860 Eg. pounds for each year).
- Doctorate (2260 Eg. pounds for each year).

For non-Egyptian students:

- Master and Doctorate (5000 dollars for each year).

- Cytology, Histology and Genetics
- Invertebrate, Parasitology and Immunology
- Comparative Anatomy and Embryology
- Physiology and Ecology
- Entomology

Duration of postgraduate programs

Total hours for study: 60 credit hours (18 credit hours compulsory courses, 6 credit hours elective, 36 credit hours equivalent for thesis)

Full-time for Master:

Minimum : 4 essential semester

Maximum:10 essential semester

Full-time for Doctorate:

Minimum : 4 essential semester

Maximum:12 essential semester

Head of Zoology and Entomology Department

Prof. Mona Abdel-Rahman Osman

Learning objectives of postgraduate programs

- ✓ Identify professional problems and find solutions in biology fields.
- ✓ Apply the basics and methodologies of scientific research and use different tools in biology.
- ✓ Develop specialized professional skills and use appropriate technological means to serve the professional practice to help in live field.
- ✓ Communicate effectively and the ability to lead teams.
- ✓ Use available resources to achieve the greatest benefit and suitability.

- ✓ Show awareness of his role in the development of society and preserve the environment in the light of global and regional changes in live still.

Your future

After you've embarked on your studies for an undergraduate degree it's not too soon to be thinking about the job opportunities that are open to you when you graduate. By studying for a Zoology and Entomology sciences degrees, you are more likely to be employable after your graduate.
